About the Major Projects Inventory

The BC Major Projects Inventory (MPI) contains summary information on major projects in the Province of British Columbia, Canada, that are over \$15 million (Cdn.) capital cost, or \$20 million in the Lower Mainland–Vancouver area.

As of September 2004, the information in this published version of the BC Major Projects Inventory continues to be prepared by Jackie Hamilton & Associates, although it is now owned and published by the Province of British Columbia.

Sources of MPI Information

Information sources include print and electronic media, developers, architects, general contractors, and government agencies (provincial, regional, municipal) as well as occasional site visits. Projects that are under consideration or proposed to be funded by the Provincial government may be listed where there is public information about such projects. The description may indicate the status of Provincial funding applications, if it is known.

Project Location

Projects are listed according to eight regions: Vancouver Island/Coast, Mainland/Southwest (Vancouver area), Thompson/Okanagan, Kootenay, Cariboo, North Coast, Nechako, and Northeast. Maps showing the location of the regions and main population centres are included in the MPI. Projects are also listed according to the nearest population centre, which could be an unincorporated centre or a local government, e.g., a municipality.

Updates

New projects are added to the database every quarter. Projects already in the database are updated, at minimum, every six months unless there is no expected change in status for a longer period of time. Projects may be shown as updated with no change in information—this means that the information shown is still valid according to the verifying source.

Estimated Costs

Cost estimates are general estimates from the information sources used.

Start and Finish Dates

Start and finish dates for proposed projects are based on estimates from the sources used, or in some cases, on reasonable assumptions. These dates are revised as new information becomes available.

Project Status

Projects are listed by status: proposed, under construction, completed, or on hold. Notes on other status indicators are also included in the project description. Projects that are on hold for longer than two years are normally removed from the publication (although retained in our database). Cancelled projects are noted in the project descriptions as cancelled, then removed from the next issue of the MPI.

Sustainable Building Design

As a new feature, the Major Projects Inventory has begun identifying sustainable building design and construction projects within the Inventory that have been registered and certified under a recognized green building rating system (e.g., LEED®, Green Globes). Certification provides greater assurance that a building will be an environmentally responsible, energy efficient, profitable, and healthy place to live, work and play. This designation has been added to the project description to promote awareness of the benefits of green buildings.

Highlights of the March 2010 Issue

This issue of the BC Major Projects Inventory lists 54 new proposed projects over \$15 million for the first quarter of 2010, with available capital cost estimates totaling approximately \$3.3 billion in potential new capital investment, if all the projects proceed.

Fifteen major projects started construction in the first quarter, with an estimated value of approximately \$1.3 billion. The largest project started was the \$400 million Rainbow Residential Development in Whistler, followed by the \$366 million Copper Mountain Mine development in the Princeton area.

Twenty-nine projects completed construction in the first quarter, with an estimated capital cost of approximately \$2.3 billion; the largest completion noted is the \$420 million Fairmont Pacific Rim Hotel Vancouver, followed by the \$330 million Woodward's Building Redevelopment in Vancouver and the \$263 million Upper Harrison Hydroelectric Project at Tipella in the Lower Mainland.

All capital costs are estimates, and therefore, subject to changes, especially in the early stages of a project proposal. Some capital costs are not included because they were not available at press time or the developer/owner requested that no capital cost be shown.

The capital cost of all major projects currently under construction in BC is estimated at \$61.2 billion, up slightly from \$60.7 billion reported in the fourth quarter of 2009. Many major project proposals listed are in very preliminary stages and are not approved for construction; therefore, capital cost estimates should be viewed with caution. The available capital cost of proposed projects is estimated at approximately \$111.4 billion, up from \$107.1 billion in the previous quarter. Approximately \$18.5 billion of projects are judged to be 'on hold' for the time being.

Roberts Bank Container Expansion Program Terminal 2 and Deltaport 3rd Berth

Vancouver Fraser Port Authority Ph: (604) 665-9000
A container expansion program at Roberts Bank consists of two projects to increase capacity from the current 900,000 TEUs to 1.3 million TEUs: Terminal 2 and the Deltaport 3rd Berth Terminal Expansion. Terminal 2, with a cost of \$750 million, is a new container port at Roberts Bank, which involves filling and dredging, and would be located adjacent to the existing Deltaport Container Terminal. The Deltaport Terminal Expansion project, with a cost of \$400 million, involved constructing a third berth. Deltaport Constructors Ltd. were awarded the contract and completed construction in Jan 2010. Expressions of Interest has been issued in Jun 2007 for the planning, building and operating of Terminal 2 in partnership with Vancouver Fraser Port Authority. The preferred proponent selected is a joint venture between APM Terminals North America and SNC-Lavalin (APM Terminals/SNC-Lavalin). In Jan 2008, the Fraser River Port Authority, North Fraser Port Authority and the Vancouver Port Authority, formed a single Canada Port Authority under the name Vancouver Fraser Port Authority.

Proposed development of a large gold/copper deposit 125 km SW of Williams Lake (192 km by road). Preliminary figures suggest an operation employing 350 people and milling 66,000 tonnes/day over a 20-year mine life with reserves of 744 million tons. Construction of a 125 km power transmission line and access roads will also be included in the construction. Pre-feasibility study was completed by Kilborn Engineering Pacific Ltd. The project has received certification in Jan 2010 under the BC Environmental Assessment Act.

Valemount To Burnaby**Trans Mountain Pipeline Expansion (TMX)**

Kinder Morgan & Pembina Pipeline Corp. Ph: (403) 514-6638
New pipeline planned in stages, called TMX, along the existing Trans Mountain Line from Edmonton, AB to Burnaby, BC, which would eventually carry 640,000 barrels/day to BC, with connections to Washington refiners. The pipeline would loop Kinder Morgan's existing 1150 km, 60 cm pipeline with a new 76 cm pipeline. TMX-1 includes the building of 7 new pump stations and upgrading 6 existing pump stations in BC at a cost of \$210 million. This portion of the project completed 2007. TMX-2 includes 243 km of 30 and 36-inch pipe between Valemount and Kamloops and back to Edmonton at a cost of \$900 million. TMX-3 is a loop between Kamloops and the Lower Mainland at a cost of \$900 million. TMX may also be accessing a new northern leg in BC to a potential new deepwater port on the north coast (see project id 1566). Regulatory approval for the pipeline modification was received in fall 2006. Capital cost is estimated for BC portions. Website: www.tmxproject.com

Kitimat**Kitimat LNG Terminal**

Kitimat LNG Inc./Pacific Northern Gas Ph: (403) 264-3330
A liquid natural gas terminal at Bish Cove, 18 km south of Kitimat, to include facilities for marine offloading, LNG storage, natural gas liquids recovery, re-gasification, and send-out facilities to deliver natural gas into the Pacific Northern Gas (PNG) pipeline. A new 1.4 km, 30 in pipeline would connect from the facilities to the PNG line. Send-out capacity is proposed at 610 MMcf/day. Project has received approval under the BC Environmental Assessment Act. Federal approval has been received. Front-end engineering and design (FEED) study is underway for liquification facility. Construction of liquification plant is expected to commence in 2010. Kitimat**Northern Gateway Pipeline Project - Crude Oil Pipeline**

Enbridge Pipelines Inc. Ph: (780) 420-5210
Proposed 30in/400 kbbpd, 1,200 km bitumen export pipeline from Edmonton, Alberta to deliver crude oil to the deep water port at Kitimat. The pipeline would deliver above 400,000 barrels/day to a tank farm for storage prior to shipping to California and the far east. Preliminary engineering and environmental overviews are completed. A second, parallel 20in/150-200kbbpd, 1200 km import pipeline will also be built to ship condensate to the oilsands (see project id 1413). Approx 2000 construction jobs are expected. Project cost is estimated for BC portion. The application to the National Energy Board was filed in Summer 2006. In 2006, Enbridge delayed the project construction start to focus on eastern pipeline projects but is now reactivating the project, and is currently conducting open houses in communities along the proposed pipeline. Regulatory review with the National Board of Energy is planned.

STATUS: PROPOSED**Atlin****New Polaris Gold Mine**

Canarc Resource Corp. Ph: (604) 685-9700
 Reactivation and expansion of a former underground gold mine approx 100 km south of Atlin and 60 km east of Juneau, Alaska. Re-modeling, metallurgical testing and engineering of a portion of the gold resources, necessary for a 65,000 opy high-grade underground gold mine, is underway. A scoping study identified the potential to develop a 65,000 oz/year to 100,000 oz./year high grade, underground gold mine over the next three years. New office and refurbished camp complex now on site. New mine resource estimate released on Feb 2007 and the mine plan is expected to complete in Spring 2007. A feasibility plan and environmental studies will be carried out prior to government permitting. Website: www.canarc.net

Fort St. John

Peace River Site C Dam

BC Hydro Ph: (250) 785-3420
Site C is a potential third dam and 900 megawatt hydroelectric generating station on the Peace River approximately 7 kilometres southwest of Fort St. John. It would be capable of producing approximately 4,600 gigawatt-hours of electricity annually - about 8 percent of BC Hydro's current electricity needs. Site C would deliver firm electricity with a high degree of flexibility. Site C was examined as a resource option over 25 years ago, however much more research and consultative work remains to be done, including technical work to bring existing information up to date. A multi-stage review process has been established for looking at Site C. Stage 1, which involved a high level review of existing information, has been completed. Stage 2 of the review, which includes extensive consultations with First Nations, the public, and other jurisdictions, is underway. If the review moves beyond Stage 2, subsequent stages would include investigations to support an application for an Environmental Assessment Certificate and applications for other required permits and approvals. The review process leading to a decision on Site C will take about five years. A final decision by government on whether to proceed will be made when all aspects of the project are fully understood. If approved, construction would take about seven years. Capital cost listed is an interim project cost estimate reported by BC Hydro in Dec 2007.

AESWapiti Power Project

Hillsborough Resources Ltd/AES Pacific Inc Ph: (604) 684-9288
The energy generation project would include a 184 MW thermal electric power plant and a 35 kilometre, 230 kV transmission line, and would have a contemplated project life of at least 40 years. Fuel for the energy generation facility would be supplied by the Wapiti coal mine for which regulatory approvals are being sought by Hillsborough (see separate entry - Wapiti Coal Mine). The power project was selected in BC Hydro's 2006 call for power; however, the project is currently on hold due to the BC government's recent policy change to require 100% carbon sequestration for any coal-fired project.
